ATTACHMENT A-2
Amended claims

1-5. (Canceled)

6. (Currently Amended) Packaging for tablet-shaped objects, comprising a closed wrapping and ~~one or more~~ at least one film packs arranged in the wrapping, ~~said packs each containing~~ pack adapted to contain at least one tablet-shaped object and having two opposing ends, each end being closed by a transverse seam, said packs further being closed in longitudinal direction by at least one ~~or more~~ longitudinal seam[s],

said wrapping having two transverse side walls being parallel to the transverse seams of the film packs and opposing one another with a selected length of separation, ~~at a predetermined distance, said wrapping further having and~~ at least one longitudinal side wall being parallel to the longitudinal seams of the film packs, wherein each film pack has a normal length is longer from end to end than the ~~distance between the opposing side walls of the wrapping that are parallel to the transverse seams of the film packs~~ said selected length of separation,

the film packs being of a material which permits resilient contraction of said normal length, and being arranged in the wrapping such that at least one end of each pack is in resilient contact with one of the transverse side walls ~~parallel to the transverse seams of the film packs~~, and

wherein ~~the at least one~~ said longitudinal side wall being parallel to the longitudinal seams of the film packs is reinforced.

7. (Currently Amended) The packaging of claim 6, wherein both ends of each film pack are in resilient contact with a transverse side wall of the wrapping ~~that is parallel to the transverse seams of the film packs~~.

8. (Currently Amended) The packaging of claim 6, wherein said longitudinal side wall ~~the at least one side wall being parallel to the longitudinal seams of the film packs~~ is reinforced with shock-absorbing inserts.

9. (Previously Presented) The packaging of claim 8, wherein the shock-absorbing inserts comprise corrugated cardboard.

10. (Previously Presented) The packaging of claim 6, wherein the wrapping is constructed to be self-supporting.
